LUXURY & CLASSIC - with a refined and comfortable spirit.

A natural wood structure, with an organic and fluid curving.

It was inspired by the three-dimensional curves of P!NTO, and follows naturally the alignment of our body. From the angle of the armrests to the angle of the joint, every detail is dedicated to the most pleasant comfort. The frame is in perfect harmony with the seat.

Designed in Japan, Production in Japan and Italy, Distribution from Italy.

4 ideal integrated supports

P!NTO is a Japanese brand developed by occupational therapist HISAKO NOMURA, who discovered that the benefits of sitting in a neutral position are superior to those of rehabilitation exercises. It is the first brand in the world specialized in ergonomic seats made with the three-dimensional technique of the ETHREEM® space structure that supports the body with 4 points of support. Pressure on the thighs and buttocks is distributed and balanced, stress and muscle tension are eliminated. Even after moving, P!NTO helps you get back into alignment.

Ergonomic design

Product design

HISAKO NOMURA × EIJI SHIBATA

EIJI SHIBATA

Born in Tokyo, TEKODesign Co., Ltd. representative. Design is an act of the best positive solution to the problems we have. The path of its activities through design is to visualize the problem, propose the plan and guide the solution.

Technical characteristics:
